SUBJECT: Request for Cancellation of MPR 8220.1,  
"Conduct of Research and Technology Activities"

In accordance with MPR 1410.2, XD01 requests approval for cancellation of MPR 8220.1, "Conduct of Research and Technology Activities."

This document was created when the NPR 7120.5 series of Program and Project Management governance was created and we were required to clearly define the differences between large programs and projects and small research activities. An understanding of this difference is now incorporated in the new NPR 7120.5 series and therefore this specific document is no longer needed.
