SUBJECT: Request for Cancellation of MPR 1280.9, "Continual Improvement"

In accordance with MPR 1410.2, DE01 requests the cancellation of MPR 1280.9, "Continual Improvement," in conjunction with the approval of Marshall Guidance Manual (MGM) 1280.1, "Guidance for Continual Improvement."

The MPR established unnecessary requirements, provided a general description of improvement activities, and provided a reference to other required processes that are documented in other Directives. The MGM will still provide the general information, guidance, and a one-stop reference to other documents.
