Reply to Attn of: IS01

TO: DA01/Director
THRU: IS20/MSFC Management Directives Manager
FROM: IS01/Office of the Chief Information Officer
SUBJECT: Request for Waiver

Waiver Number: MWI 1410.1-WAV01

In accordance with MPR 1410.2, IS01 requests approval for waiver from MWI 1410.1.

Define the proposed departure from the requirement(s):

The current "Directives Control Process" administered by the Tango application server on a Sun 5000 Solaris platform is being replaced by a new "Directives Review Process". The "Directives Control Process" described in MWI 1410.1 Rev. D will continue to operate until all directives submitted prior to June 15, 2007, are phased out.

The new Marshall Management Directives System "Directives Review Process" was implemented on June 15, 2007, and administered by Documentum. Instructions for using the "Directives Review Process" are available in user manuals provided on the new "Directives Review Process" Web page found on the Marshall Integrated Document Library site.

Justification for the deviation/waiver (waivers must include references to any applicable nonconformance, discrepancy, or deficiency report(s)):

The Marshall Management Directives System "Directives Control Process" administered by the Tango application server on a Sun 5000 Solaris platform is antiquated and unsupported. A large number of directives in various stages of process are currently in the Tango system and it would be unproductive and inefficient to transfer them to the new process. However, the "Directives Review Process" supported by Documentum and implemented June 15, 2007, will process all future revised directives.

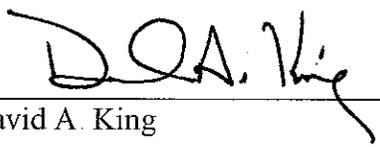

Applicability, impacts, and conditions (if any) of waiver:

This waiver will remain in effect until all directives have been completed in the old "Directives Control Process."

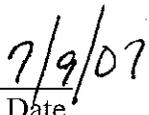

Alternate plans to meet any ISO 9001 or AS9100 requirement(s):

MWI 1410.1 Revision E is in process to address instructions for the "Directives Review Process," and in the interim, user manuals are be posted on the "Directives Review Process" Web page until Revision E is official. Upon approval of Revision E, MWI 1410.1 Revision D will be available on the applicable Web page for the "Directives Control Process" until phase-out of currently submitted revised directives is complete.
